Catalyst

ORGANIZATION:

Catalyst Papers
https://www.catalystpaper.com/

Catalyst Papers manufacture diverse printing papers, newsprint and pulp for retailers, publishers and commercial printers.

INDUSTRY:

Papermaking

CHALLENGE:

Catalyst Papers was looking for a reliable solution for emergency notifications.

SOLUTION:

Using DeskAlerts for leveraging the API to send Critical Safety messages out of Data Historian systems

BENEFITS:

The opportunity to drive for results and ensure we are taking all steps necessary in order to ensure the health and safety of employees.

At Catalyst Papers, we have used DeskAlerts for a variety of functions, one of which is leveraging the API to send Critical Safety messages out of our Data Historian systems. By monitoring sensors in various areas of our production environment we are able to trigger plant wide messages in the event that hazardous conditions arise, such as dangerous levels of sulphur dioxide (SO_2) and hydrogen sulphide (H_2S).
Safety and Environmental Stewardship are part of our core operating philosophies, and the flexibility that the Desk Alerts API offers has allowed us the opportunity to drive for results in this category, and ensure we are taking all steps necessary in order to ensure the health and safety of our employees.
